

## LIST OF TABLES

Table 2-1 Comparison of GA with other optimisation methods.....	59
Table 2-2 Parameters used for GA.....	61
Table 3-1 Parameters for real-time model .....	67
Table 3-2 Rule base for pendulum angle controller using Mamdani FIS .....	69
Table 3-3 Settling time and peak value of pendulum angle for PID controller .....	74
Table 3-4 Performance indices for PID controller.....	74
Table 3-5 Settling time and peak value of pendulum angle for fuzzy logic control .....	76
Table 3-6 Performance indices for fuzzy logic control .....	76
Table 3-7 Settling time and peak value of pendulum angle for optimized fuzzy logic control .....	79
Table 3-8 Performance indices for optimized fuzzy logic control .....	79
Table 3-9 Settling time and peak value comparison.....	81
Table 3-10 Performance indices comparison.....	81
Table 3-11 settling time comparison of proposed controller with reference controller.....	83
Table 3-12 settling time comparison of proposed controller with reference controller [95] .....	84
Table 3-13 settling time comparison of proposed controller with reference controller [96] .....	85
Table 4-1 Parameters of the physical model used .....	90
Table 4-2 Rule base for pitch/yaw angle error, rate of change of error and Control signal.....	93
Table 4-3 Performance indices for PID controller with unit step set-point change .....	97
Table 4-4 Performance indices for PID controller with random set-point change .....	98
Table 4-5 Performance indices for FLC with dynamically changing set-point .....	101

Table 4-6 Performance indices for Optimized Fuzzy Logic Controller with unit step set-point change.....	103
Table 4-7 Performance indices for FLC with dynamically changing set-point .....	104
Table 4-8 Performance indices comparison for PID, FLC and optimized FLC for step change in set point .....	106
Table 4-9 Comparison of performance indices for PID, FLC and optimized FLC for dynamically changing pitch and yaw angle set-points .....	108
Table 4-10 Performance comparison for pitch angle response.....	111
Table 4-11 Performance comparison for yaw angle response .....	111
Table 4-12 Performance comparison for pitch angle response.....	114
Table 4-13 Performance comparison for yaw angle response .....	114
Table 5-1 Parameters of the physical model used .....	121
Table 5-2 Rule base for ball position error, rate of change of error and Control signal .....	122
Table 5-3 Performance indices for PID controller with unit step set-point change .....	125
Table 5-4 Performance indices for PID controller with sinusoidal set-point change .....	126
Table 5-5 Performance indices for PID controller with unit step set-point change .....	127
Table 5-6 Performance indices for FLC with sinusoidal set-point change....	127
Table 5-7 Performance indices for optimized PID controller with unit step set-point change .....	128
Table 5-8 Performance indices for PID controller with sinusoidal set-point change .....	129
Table 5-9 Error indices comparison for PID, FLC and optimized FLC for step changes in desired position .....	130
Table 5-10 Error indices comparison for PID, FLC and optimized FLC for step changes in desired position.....	131
Table 5-11 Performance comparison for step changes in desired ball position .....	132

Table 5-12 Performance comparison for step changes in desired ball position  
..... 134
