

## List of Tables

<b>Tables</b>		<b>Page</b>
Table 1.1:	Comparison between different energy sources	1
Table 2.1:	Comparison of electromagnetic and permanent magnetic generator	16
Table 2.2:	The characteristics for magnetic materials	18
Table 2.3:	Composition of mu metal	23
Table 2.4:	Physical and electrical properties of the gate material	24
Table 2.5:	Air gap shear stress for magnetic generator	25
Table 2.6:	Physical and electrical properties of various materials	26
Table 3.1:	GOPI engine cylinder detailing	53
Table 3.2:	Coefficient of thermal expansion	56
Table 3.3:	Piston detailing	61
Table 4.1:	Magnetic field intensity and distance relation for a permanent magnet	69
Table 4.2:	Force at the center of two magnets for various distances ( $H=1.2$ T)	69
Table 4.3:	Magnetic field shielding for $t=1$ mm and different permeability and distance	77
Table 4.4:	Magnetic field shielding for different values of $\mu$ for $t=2$ mm	80
Table 4.5:	Magnetic field shielding for different distances of the gate from $m_1$ and $m_2$	81
Table 4.6:	Mechanical properties of the GOPI engine	81
Table 4.7:	Magneto -Mechanical properties of the GOPI engine	82
Table 4.8:	Magnetic properties of the GOPI engine	82
Table 4.9:	The coordinates of the piston and the gate	83
Table 4.10:	Theoretical relation between the GOPI engine parameters ( $d=0$ )	92

Table 4.11:	Theoretical relation between the GOPI engine parameters ( $d \neq 0$ )	93
Table 4.12:	GOPI engine Parameters	95
Table 4.13:	Force at piston head for different piston position (from TDC to BDC)	96
Table 4.14:	Effective force at piston head moving from TDC to BDC	96
Table 4.15:	Attachment of gate with $m_1$ & $m_2$ for different position of the piston	97
Table 5.1:	Major parameters of GOPI engine	101
