

## Table of Contents

---

Declaration	i
Certificate	ii–iv
Acknowledgements	v–vii
Executive Summary	viii–xii
List of Symbols/Abbreviations	xiii–xiv
List of Figures	xv–xxvii
List of Tables	xxviii
<b>Chapter 1: Introduction</b>	<b>1–21</b>
1.1. Statement of the Thesis	1
1.2. Motivation for the present Research	2
1.3. Rationale of the Present Work	3
1.4. Study Area	4–9
1.3.1. Garhwal Himalaya	6
1.3.2. Kangra-Chamba sector	7
1.3.3. Kinnaur Himalaya	8
1.5. Objectives	9
1.6. Geological and Tectonic Setting of the Himalaya	9–18
1.6.1. Geology of the Himalaya	9
1.6.2. Tectonics of the Northwestern (NW) Himalaya	11
1.6.3. Seismicity of the Northwestern (NW) Himalaya	15
1.7. Chapter Scheme	18
1.8. Contribution made by the Scholar	20

<b>Chapter 2:Methodology</b>	<b>22–49</b>
2.1.Seismic Data Acquisition and Processing	22
2.2. Determining the 1 D Crustal Velocity Model	25
2.3.Double-difference Relocation of Seismicity using HypoDD	28
2.4.Determination of Focal mechanisms	29
2.5.Estimation of Static Stress Transfer Phenomenon in NW Himalaya	41
2.6.Determination of Frequency Dependency Attenuation Characteristics of Coda Waves	47
2.7.Gravity Anomaly and Lithospheric Structure for the NW Himalaya	49
<b>Chapter 3:1D Crustal Velocity Model: Pand S-wave travel Time Inversion Study</b>	<b>50–69</b>
3.1. Introduction	50
3.2.Initial Hypocentral Locations	51
3.3. Calculation of minimum 1 D velocity model	57
3.4. Optimal 1 D crustal velocity model	59
3.5. Stability Test for the derived minimum 1 D crustal velocity model	62
3.6. Seismicity study and JHD	65
3.7. JHD and earthquake hypocenter depth in NW Himalaya	68
<b>Chapter 4:Seismotectonics of the Western Himalayan segment, NW Himalaya, India</b>	<b>70–92</b>
4.1. Introduction	70
4.2. Initial earthquake locations with Hypo71	73
4.3. Relocating the earthquake hypocenters in the NW Himalaya utilizing HypoDD	73
4.4. Relocated hypocenters and reduced errors in terms of hypocentral parameters	74
4.5. Spatio-Temporal variation of seismicity from	

double-difference relocation	78
4.6. Moment Tensor Focal mechanisms	80
4.7. Seismotectonics of the NW Himalaya	89
<b>Chapter 5: Seismic hazard assessment and static stress estimation in and around the source zone of past major earthquakes of Northwestern Himalaya, India</b>	<b>93–123</b>
5.1. Introduction	93
5.2. Modeling Coulomb failure static stress changes	96
5.3. Fault geometry, frictional-coefficient and depth of computation for specific earthquakes	98
5.4. Stress pattern scenario in NW Himalaya	99–123
5.4.1. 1905 Kangra earthquake	99
5.4.2. 1975 Kinnaur earthquake	109
5.4.3. 1991 Uttarkashi earthquake	113
5.4.4. 1999 Chamoli earthquake	119
<b>Chapter 6: Seismological and Geophysical constraint to the crustal structure beneath the North Western Himalaya, India</b>	<b>125–145</b>
6.1. Introduction	125
6.2. 1 D Crustal velocity model and seismicity relocation using JHD	125
6.3. Microseismicity, Tectonics and seismic potential of NW Himalaya	127
6.4. Static stress change and earthquake triggering in the NW Himalaya	138
6.5. Seismic attenuation characteristics of NW Himalaya	138
6.6. Gravity anomalies and Lithospheric structure of NW Himalaya	139
6.6.1. Isostatic studies and Effective elastic Thickness (EET)	141

6.6.2. 2D Density model for NW Himalaya	144
<b>Chapter 7: Conclusions and Future Perspectives</b>	<b>147–151</b>
7.1. Conclusions	147
7.2. Future prospective	150
<b>Chapter 8: References</b>	<b>152–167</b>
