

Name:	 <b>UPES</b> <small>UNIVERSITY WITH A PURPOSE</small>
Enrolment No:	

**UNIVERSITY OF PETROLEUM AND ENERGY STUDIES**  
**End Semester Examination, December 2021**

<b>Course: Data Preparation</b>	<b>Semester: V</b>
<b>Program: BBA Analytics and Big Data</b>	<b>Time: 03 Hours</b>
<b>Course code: DSIT3004</b>	<b>Max. Marks: 100</b>

**SECTION A ( 20 Marks)**

		Marks	CO
1.	<b>Each question in section A is a multiple-choice question with four answer choices. Read each question and choose the one best answer.</b>		
i)	Which of the following is not a Tableau Prep field data type:  a) Number(Whole) b) String c) Boolean d) Float	2	CO1
ii)	For creating variable size bin we use .....  a) Sets b) Groups c) Calculated fields d) Table Calculations	2	CO1
iii)	Missing data isn't really a problem if I'm just doing simple statistics, like chi-squares and t-tests. a) True b) False	2	CO1
iv)	Based on the data validation rule below, what will show up in the drop down list in the cell?   <div style="border: 1px solid black; padding: 5px; margin-left: 20px;"> a) The values shown in cells A17 through A20  b) \$A\$17:\$A\$20  c) The values A17, A18, A19, A20  d) Don't know </div>	2	CO1

v)	<p>What is the file extension for tableau prep flow file:</p> <ul style="list-style-type: none"> <li>a) .tde</li> <li>b) .tfd</li> <li>c) .tfl</li> <li>d) .tdf</li> </ul>	2	CO1
vi)	<p>In standardization, the features will be rescaled with</p> <ul style="list-style-type: none"> <li>a) Mean 0 and Variance 0</li> <li>b) Mean 0 and Variance 1</li> <li>c) Mean 1 and Variance 0</li> <li>d) Mean 1 and Variance 1</li> </ul>	2	CO1
vii)	<p>To remove noise and inconsistent data ____ is needed.</p> <ul style="list-style-type: none"> <li>a) Data Cleaning</li> <li>b) Data Transformation</li> <li>c) Data Reduction</li> <li>d) Data Integration</li> </ul>	2	CO1
viii)	<p>Multiple data sources may be combined is called as _____</p> <ul style="list-style-type: none"> <li>a) Data Reduction</li> <li>b) Data Cleaning</li> <li>c) Data Integration</li> <li>d) Data Transformation</li> </ul>	2	CO1
ix)	<p>Examples of Ordinal scale can be:</p> <ul style="list-style-type: none"> <li>a) ID Numbers, eye color, zip codes</li> <li>b) Rankings, taste of potato chips, grades, height</li> <li>c) Calendar dates, temperatures in Celsius or Fahrenheit, phone numbers</li> <li>d) D. Temperature in Kelvin, length, time, counts</li> </ul>	2	CO1
x)	<p>Which of the following is true about outliers -</p> <ul style="list-style-type: none"> <li>a) Data points that deviate a lot from normal observations</li> <li>b) Can reduce the accuracy of the model</li> <li>c) Both A and B</li> <li>d) None</li> </ul>	2	CO1

<b>SECTION B</b>		<b>( 20 Marks)</b>															
<p><b>This section has 4 Questions of 5 marks each.</b>  <b>These questions are short answer type.</b>  <b>All the questions are compulsory.</b></p>																	
2.	Write Five useful spreadsheet file format for data storage.	5	CO2														
3.	What are the three different uses of Calculated filed in tableau Prep.	5	CO2														
4.	To validate few cells in excel for data entry what will be formula if condition is that each entry should be unique start with a fixed letter and length of the entry is 5.	5	CO2														
5.	What is the uses of QQ plot in data preparation.	5	CO2														
<b>SECTION-C</b>		<b>( 30 Marks)</b>															
<p><b>This section has 3 Questions of 10 marks each, out of which first 2 Questions are compulsory.</b>  <b>Questions 8 has internal choice to attempt any one.</b></p>																	
6.	What is standard score transformation discuss with example.	10	CO3														
7.	What is the use of Jarque-Bera Test. Discuss with example.	10	CO3														
8.	<p>What are different type of missingness. Discuss with example.</p> <p style="text-align: center;"><b>OR</b></p> <p>What is the difference between case deletion technique and pairwise deletion techniques. Discuss with example.</p>	10	CO3														
<b>SECTION-D</b>		<b>( 30 Marks)</b>															
<p><b>This section has 2 Questions of 15 marks each, out of which Question 9 is compulsory and Question 10 has internal choice to attempt any one.</b></p>																	
9.	<p>For the given data set suggest and apply two methods for imputing the missing values and discuss the merit and demerit of the results obtained by the suggested methods.</p> <table border="1" style="margin-left: 20px;"> <tbody> <tr> <td style="text-align: center;">Y</td> <td style="text-align: center;">X</td> </tr> <tr> <td style="text-align: center;">10</td> <td style="text-align: center;">8</td> </tr> <tr> <td style="text-align: center;">14</td> <td style="text-align: center;">7</td> </tr> <tr> <td style="text-align: center;">12</td> <td></td> </tr> <tr> <td style="text-align: center;">10</td> <td style="text-align: center;">6</td> </tr> <tr> <td style="text-align: center;">8</td> <td></td> </tr> <tr> <td style="text-align: center;">9</td> <td style="text-align: center;">7</td> </tr> </tbody> </table>	Y	X	10	8	14	7	12		10	6	8		9	7	15	CO4
Y	X																
10	8																
14	7																
12																	
10	6																
8																	
9	7																

**10.** Using Grubbs' Test verify that in the following data set there is actual outlier present or not. (Assume that data is normally distributed and use  $t\text{-critical}=3.3$ )

145,125,190,135,220,130,210,3,165,165,150

OR

Using the Chi-square test verify that the following data is normally distributed or not at 5% Level of significance.

Returns	Observed Frequency
-15% to -5%	22
-5% to +5%	29
+5% to +15%	37
+15% to +25%	12

(Given  $P(Z \leq 0) = 0.5, P(Z \leq 1) = 0.1587, P(Z \leq 2) = 0.9773$ )

**Chi-square Distribution Table**

d.f.	.995	.99	.975	.95	.9	.1	.05	.025	.01
