

Name:								
Enrolment No:								
<b>UPES</b> <b>End Semester Examination, December 2023</b>								
<b>Course: Materials Science</b>		<b>Semester : 3rd SEM</b>						
<b>Program: Mechanical Engineering/Mechatronics Engineering</b>		<b>Time : 03 hrs.</b>						
<b>Course Code: MEMA2001</b>		<b>Max. Marks : 100</b>						
<b>Instructions:</b> Attempt all questions. One question from section C has an internal Choice. Assume any missing data if required.								
<b>SECTION A</b> <b>(5Qx4M=20Marks)</b>								
S. No.		Marks	CO					
Q 1	Define Screw and Edge dislocation with a suitable scheme.	4	CO1					
Q 2	Neatly sketch the various fatigue loading cycles	4	CO1					
Q 3	Draw the scheme of an isomorphous phase diagram of two component system with all the important labels.	4	CO2					
Q4	Distinguish between system, phase, component, and microstructure.	4	CO2					
Q 5	Differentiate in between eutectic, eutectoid and peritectic invariant reactions.	4	CO1					
<b>SECTION B</b> <b>(4Qx10M= 40 Marks)</b>								
Q 6	(a) Write a short note on Liquid Penetrant Testing with a suitable scheme. (b) Discuss 2 types of brittle fractures with a suitable scheme.	6 4	CO1					
Q 7	(a) Explain Ductile-to-Brittle Transition of a materials. (b) Explain the structure and properties of malleable cast iron	5 5	CO2					
Q 8	(a) Derive the expression which relates interplanar spacing, Miller indices and dimension of the cubic unit cell. (b) Illustrate the process of measuring toughness values for structural materials.	5 5	CO3					
Q 9	(a) Analyze the fracture surface and identify their nature of failure.	4	CO4					
	<table border="1" style="width: 100%; text-align: center;"> <tr> <td>(a)</td> <td>(b)</td> <td>(c)</td> </tr> <tr> <td></td> <td>(d) </td> <td></td> </tr> </table>	(a)		(b)	(c)		(d) 	
(a)	(b)	(c)						
	(d) 							

	<p>5 atomic % in B.</p> <p>Label the phase diagram. Calculate fractions of proeutectoid phase and eutectic mixture at the eutectic temperature for the alloy containing 25 atomic % B.</p> <p><b>(ii)</b> Make a T-T-T curve for 0.8 wt% eutectoid steel. Mark the areas of coarse perlite, fine perlite, upper bainite and lower bainite.</p>	10
